# Style & Quality

Crossover Collection Spas are rotationally molded using special formulated LLDPE for a unibody construction that creates an elegant durable finish guaranteed not to split, peel, rot or rust.

Rotationally molded spas are considered the smart alternative to acrylic spas not only because of great price but also their dependable quality, energy efficiency and environmentally friendly manufacturing process.

Crossover 730L spas*

# 730L Crossover Collection Spa Features

Solid, deep lounge side hand grip

The comfort lounge seat in the 730L has eight adjustable massage jets from your shoulders to lower back, two calf muscle jets and two for the bottom of your feet.

Color coordinated two tone adjustable stainless steel massage jets

Clear frosted MoonGlo lid and filter grill becomes a waterfall that glows with the LED light

Eight Exterior Corner LED Lights Synchronized with MoonGlo LED

Beginning with the simple set-up, to the affordable energy-efficient heating system, to the convenient access panels, you'll discover every aspect of the Crossover 730L is designed from a user's point of view.

## Quad Energy System for Heat Efficiency

### Green Guard Thermal Retention.

Our proprietary insulation technology combines the heat retention from closed air chambers with sealed insulation panels layered along the interior and base of the spa.

### Proprietary Control M7 heating technology.

The Digital Control system with the M7 heater makes it easy to adjust your hot tub's water temperature and water flow action to your preferences.

**Friction preheater.** Heat is harnessed by the natural energy created by the rapid movement of the water.

**Passive Energy.** Captured free heat is then circulated inside the spa cabinetry to provide additional passive energy efficiency.

### Super Seal Cover

Unlike other covers on the market that only seal on the top surface of the spa, our Super Seal cover seals on two surfaces helping to lock in heat and save energy, keep out debris and provide peace of mind knowing your spa is sealed and protected. Cover seal strap latch clamps are provided with your spa.

### Digital Controls

Our patented Digital Control Systems makes operating your spa easy. Select your preferred temperature, water action and LED lighting for the waterfall and MoonGlo filter housing with the touch of your fingertips.

### Engineered Convenience

Access to your hot tub's pump for maintenance, inspection and water drain is easy through the side service panel.

### Green Guard Insulation

Green Guard is a high R-value, sealed insulation that is hydrophobic to repel moisture, preventing the growth of fungi or mildew. Its light-weight, sound-deadening, qualities supply superior insulating properties to trap in heat and lock out cold.

Deep recessed  
interlock  
cover channel

Super Seal Cover design  
locks in energy savings!

## Options and Accessories to Enhance your Spa Experience!

Dream Maker Spas offers a number of options and accessories to help you get the most out of your spa experience. Ask your dealer for more information about these and other Dream Maker Spas products.

### Ambiance Package: LED Perimeter Lighting

When you order the Ambiance Package with your new spa, you are requesting factory installed perimeter lighting be placed inside your spa that is synchronized with the color of the LED in your MoonGlo waterfall lid and grill, programmable to your color choice.

**Swivel Handle Handrail:**  
Allows you to rotate handle for spa entry, exit and cover placement.

**3-Piece Planter/Storage Step:**  
For easy spa access, storage and natural decoration. Planters can be tucked into the step or placed separately by the sides. A great way to coordinate nature to your spa environment.

**DreamLift Cover Lifter:**  
Helps you lift and store your spa cover conveniently next to the side while your spa is in use, then lift the cover back into position to seal it for spa protection and energy savings.
