

**Dream Maker Spas** are rotationally molded for a unibody construction that creates an elegant, durable finish guaranteed not to split, crack, peel, rot or rust.

Enjoy the soothing water jets and LED lighted waterfall as it illuminates at night through the translucent MoonGlo filter lid and cover grill. Control the water action, temperature and lights by the touch of a finger using the digital controls. Easy turn top valves allow you to regulate the water and air flow through the jets.

Thanks to advances in technology, rotationally molded spas are now considered the smart alternative to expensive acrylic models, not only because of the great price but also quality, efficiency, energy savings and the environmentally friendly manufacturing process.

Choose from 3 spa colors and 2 panel textures.

	1	2	3
<b>Spa Colors:</b>	 GrayStone	 CobbleStone	 BrownStone
