

Your spa is equipped with the Dream Maker Bluetooth Audio System.

You will notice two stereo speakers installed on your front panel, as shown below.

You can connect to the audio system with virtually any Bluetooth enabled audio device such as a smartphone or tablet within range (about 30-50 feet, 9 – 15 meters).

OPERATION

Whenever the spa is powered, the audio system is ready to pair with your Bluetooth enabled audio device. Other than supplying power to the spa, there is nothing to activate on the spa.

To connect to the audio system, on your Bluetooth audio device, search for, and pair with *V4BT4015*.

Volume and all other functions are controlled through your Bluetooth audio device.

Troubleshooting:

Unable to pair

Possible solution:

- If you have previously paired with *V4BT4015*, instruct your audio device to *forget V4BT4015* and find it again.
- Ensure there is no other device paired with *V4BT4015*. There can only be one device paired, at one time.
- Ensure that you are near enough to the spa (30 to 50 feet, 9 – 15 meters) to enable pairing.

FCC AUTHORIZATION

Name of grantee: Austin-Whitman Mfg. Group LLC
Equipment class: Digital Transmission System
Bluetooth Stereo Amplifier
This device complies with FCC Rules Part 15C.
Frequency range 2402.0 – 2480.0
